

Estimated Rate of New Prostate Cancer Cases and Deaths in the United States States and Congressional Districts

Source: CDC, February 2019

Estimated Rate of New Cancer Cases and Deaths in the United States – States 2011-2015

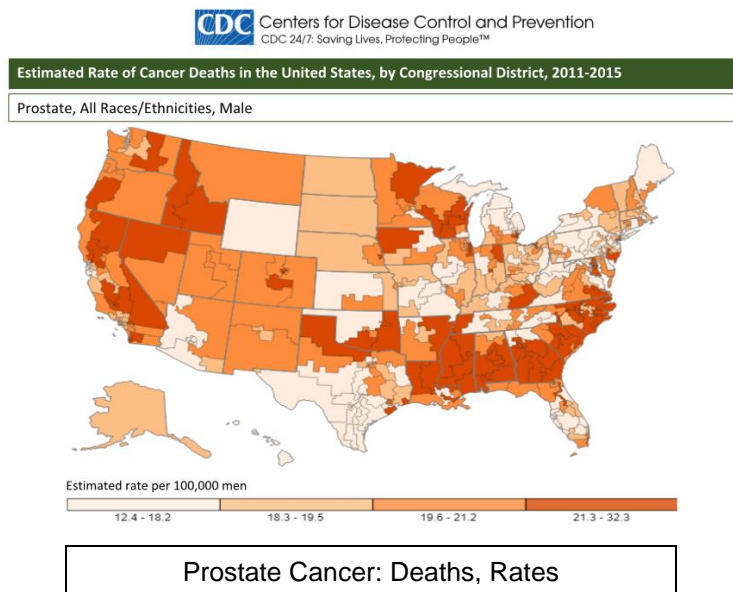

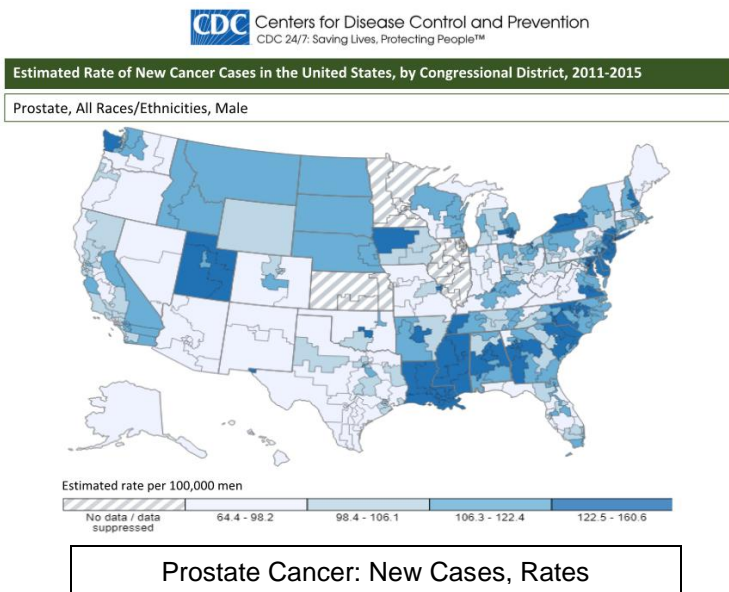

Prostate, All Ages, All Races/Ethnicities, Male - Rate per 100,000 men – Age Adjusted

From 2011-2015, 953,204 new cases of Prostate Cancer were reported, and 140,086 men died of Prostate Cancer in the United States. For every 100,000 men, 109 new Prostate Cancer cases were reported and 20 died of cancer.

^ Five-year totals – 2011-2015

Estimated Rate of New Cancer Cases and Deaths in the United States, by Congressional District, 2011-2015

Prostate, All Races/Ethnicities, Male - Estimated rate per 100,000 men

^ Five-year totals – 2011-2015

* Data Suppressed

- Congressional District incidence rates and counts are not available from Kansas and Minnesota because of state legislation and regulations which prohibit the release of these data to outside entities.
- Illinois opted not to present congressional district-specific estimated incidence case counts and rates.
- Delaware, Kentucky, and Massachusetts opted not to present congressional district-specific estimated Hispanic incidence case counts and rates.
- Pennsylvania opted not to present congressional district-specific estimated non-Hispanic white incidence case counts and rates.
